Issues encountered: None

Issues resolved: None

Percentage contribution: 10%

Weaknesses:

- Procrastinator

Strengths:

- Committed and hardworking

Name: Durgin Sweet

This week's role: Developer

Duties performed this week: I worked on the Future Plan document, and I did a bit of coding for the backend of the room functionality.

Issues encountered: None

Issues resolved: None

Percentage contribution: 20%

Weaknesses:

- Procrastinator

Strengths:

- Coding skills

Name: Joshua Schaff

This week's role: Product Owner

Duties performed this week: Worked on unit testing, use case testing. Several methods were added due to some failed unit tests. I also worked on implementing FirebaseAuth in our application.

Issues encountered: The application had to be upgraded to use AndroidX to be used with Firebase, which proved difficult. Flutter still confuses me for some of the more basic features like adding components to pages. The sign out function stopped working, but users can get back to the login/register page by reloading the application.

Issues resolved: I was able to get Firebase to connect to the application.

Percentage contribution: 20%

Weaknesses:

- Procrastinator

Strengths:

- Washboard abs
- Knows what he's doing
