P.A.L.S.S. Team Member Report 3

Name: Matthew Prescott

This week's role: Developer

Next week's roles: Developer

Duties performed this week: I created and worked on the Software Architecture Document.

Issues encountered: There was only vague information of what if required within a the software architecture document and no guidelines or template. So it took a lot of research to find out what this document is what content belongs in it.

Issues resolved: I was able to find several sources and samples of software architecture documents that help with understanding of what it is.

Percentage contribution: 20%

Weaknesses:

● Procrastinator

Strengths:

● Good eye for visual design

Name: Matthew Ackley

This week's role: Product Owner

Next week's roles: Developer

Duties performed this week: This week I completed the Domain Model document, which included getting familiar with the diagram creation tool Creately. I also completed updates on the Use Case Document, including updating those diagrams and adding a new use case. As the product owner, I also updated the Product Backlog and decided which cases should be modeled by the sequence diagram document (and which we should try to implement in code, but very little time was afforded for this). I also created the package diagram which was used in the Architecture document.

Issues encountered: Same as last week, with the addition of a failed attempt to work with Umple to create our diagrams created by limited customizability options.

Issues resolved: I instead used Creately to generate our diagrams, which was a much cleaner and less time-consuming process.

Percentage contribution: 20%

Weaknesses:

- Procrastinator

Strengths:

- Did an excellent job with diagram design
- Very well organized overall

Name: Aiden Lammert

This week's role: Scrum master

Next week's roles: Developer

Duties performed this week: My primary duties this week were to update the project description and user story spreadsheets. I also hosted the focus group and wrote up the documentation for that.

Issues encountered: As usual, lack of time to work on this project has caused issues with getting documentation done.

Issues resolved: None

Percentage contribution: 20%

Weaknesses:

- Procrastinator

Strengths:

- Organized focus group in a short amount of time
- Good communication
- Clear goals, early execution

Name: Durgin Sweet

This week's role: Developer

Next week's roles: Product Owner

Duties performed this week: This week, I primarily worked on the creation of the

Issues encountered: The primary issue was one of time management, since I had several deadlines coming up at the same time, so it was a challenge trying to manage my time effectively.

Issues resolved: I did manage to get everything one on time, so in the end I did figure out how to effectively manage my time enough to finish my work before I had to leave.

Percentage contribution: 20%

Weaknesses:
- Procrastinator

Strengths:
- Proactive on this week's work

Name: Joshua Schaff

This week's role: This week I was part of the development team.

Next week's roles: Next I will be the Scrum master. (unless someone else wants to)

Duties performed this week: I worked on updating and editing the System Requirements Document. I also assisted in the creation of the sequence diagram document.

Issues encountered: N/A

Issues resolved: N/A

Percentage contribution: 20%

Weaknesses:

- Procrastinator

Strengths:

- Willing to listen to group members' opinions
- Proactive on this week's work
